

Communicator

The versatile remote communication & alarm system for livestock growers

Rotem presents the **Communicator**, an integrated remote communication and alarm system that gives livestock growers full control over all events and procedures – even when they are away from the farm.

Benefits:

- Stay connected with all Rotem control & management systems installed on your farm.
- Use the communication technology of your choice: telephone, cell phone, radio, line modem, SMS, email, pager or internet.
- Receive real time alarms.
- Receive accurate, real-time data 24/7.
- Change controller settings remotely.
- Enjoy the user-friendly interface: a full alphanumeric keypad, a large LCD for messages, LED indicators and personally customized voice messages.

Main features:

- Plug-in cellular modem
- Text messages
- Voice card sends audio alarms messages
- Plug-in line modem
- 8 digital inputs
- Battery backup
- Wired / wireless communication to the farm office from the controllers
